HARRISONVILLE TELEPHONE COMPANY SERVICE QUALITY STANDARDS AND CONSUMER PROTECTION

Service Quality Standards Compliance

Per Subpart A, Section 730.100 of Title 83, Chapter 1, Subchapter f of the Illinois Administrative Code, Harrisonville Telephone Company is required to meet the service quality standards contained in Section 730. Subpart E of this section addresses "Standards of Quality of Service". Subpart A, Section 730.115 requires the quarterly reporting of various installation, repair and answer time data for Illinois Commerce Commission and public review.

Consumer Protection Rules Compliance

Harrisonville Telephone Company complies with the requirements of 47 CFR Part 64 Subpart U, Customer Proprietary Network Information and Subpart Y, Truth in Billing Requirements for Common Carrier, and Federal Trade Commission Red Flag rules to prevent identity theft. A Company Manual for CPNI and Red Flags is in place and employee training is conducted annually. New hires are instructed on the programs as required by their job functions.

HARRISONVILLE TELEPHONE COMPANY FUNCTIONALITY IN EMERGENCY SITUATIONS

Back-up Power Capability

All seven host/remote GTD-5 switching locations utilize natural gas or LP powered generation backup. These units can provide multi-hours of operation based on fuel consumption. In the event of a power failure, these units are utilized via an automatic transfer switch between commercial and generator power. Each generator is tested on a weekly basis. In addition, each location has battery support for the 48VDC plant facilities that can also run on an 8-12 hour timeframe. Additionally, all DLC locations have generator backup.

Capability to Reroute Traffic Around Damaged Facilities

The HTC network consists of multi-fiber routes within the serving territory, plus multiple ingress/egress connections from the north (Dupo, Illinois) and the south (Red Bud, Illinois). Within the internal HTC serving territory, if there is a fiber failure between communities, the facilities complete an automatic failover to the alternate route. In the event there is a failure with the north or south ingress/egress connections out of the HTC network, communications and data connectivity are routed via the operational alternate route. These alternate routes ensure maximum up-time for HTC services.

Capability to Manage Traffic Spikes Resulting from Emergency Situations

Currently we have multiple voice carrier ingress/egress connections to support overflow of voice traffic in the event there is congestion within a carrier link. This may be managed via alternate north/south routes, or re-routing traffic to less congested carrier connections. In reference to the data ingress/egress, this connectivity is based on a diverse ring configuration. In the event there is a failure on one of the links that generates traffic congestion, additional traffic is re-routed to the alternate less congested route.

HARRISONVILLE TELEPHONE COMPANY TERMS & CONDITIONS OF VOICE TELEPHONY LIFELINE PLANS

Harrisonville Telephone Company offers tariffed residential basic local exchange service which provides a network access line and unlimited calling on a flat rate basis to all exchanges within the local calling area. The tariffed rate for this service is \$27.89, including the federal subscriber line charge, less the Lifeline discount of \$9.25 for a total of \$18.64. For toll calls outside of the local calling area, the subscriber must choose an interexchange carrier. The rates for toll calls will be the rates charged by the subscriber's chosen interexchange carrier and selected calling plan.
